## OFF HIGHWAY WHEELS

### Large Surface Mine (45-inch and up)

- Rigid Haulers
- Loaders
- CAT
- Komatsu
- Hitachi
- Liebherr
- Terex
- BelAZ
- LeTourneau

### Underground Mining

- Haulers
- Loaders
- Jumbo Drills
- Shuttle Cars
- CAT
- Komatsu / Joy
- Sandvik
- Atlas Copco
- Epiroc
- Getman
- Normet

### Small Mine / Aggregate / Quarry

- Rigid Haulers
- Articulated Haulers
- Loaders
- CAT
- John Deere
- Komatsu
- Bell
- Doosan
- Hitachi
- Liebherr
- Volvo
- SANY
- Terex

### Construction / Roadwork

- Articulated Haulers
- Loaders
- Graders
- Scrapers
- Rollers / Compactors
- CAT
- John Deere
- Komatsu
- Bell
- BOMAG
- CASE
- Doosan
- HAMM
- Liebherr
- Volvo
- SANY
- Terex
- Wacker Neuson
- XCMG

### Forklift / Material Handling

- Forklifts
- Container Handlers
- Reach Stackers
- Straddle Carriers
- Shunt Trucks
- Crown
- Doosan
- Fantuzzi
- Hyster
- Hyundai
- Kalmar
- Konecranes
- Komatsu
- Ottawa
- Taylor
- Terex
- Toplift Ferrari
- Toyota
- Yale

### Logging / Forestry

- Skidders
- Forwarders
- Loaders
- Logging Trucks
- CAT
- John Deere
- Tigercat
- LeTourneau
- Wagner

## HEAVY EQUIPMENT JACKING

### SaferLift Jacks by GMI Wheels

Rugged heavy equipment jacks that offer excellent safety, quality value, and a wealth of customization. The SaferLift lineup includes Extensions and Stands for safe equipment lifting.

- **SaferLift SL Series - Standard**  
60 - 300 ton capacities
- **SaferLift JR Series - Compact**  
100, 150, 200 ton capacities  
Compact footprint for easy maneuverability.
- **SaferLift LP Series - Low Profile**  
50 - 100 ton capacities  
Designed for low clearance applications.

#### Customizations Include

- Stroke, load caps, locking collars, power-drive wheels, upgrades suspension, LED lighting, hand guards, foam filled tires.

#### Available accessories

- Jack Extensions
- Jack Stands
- Jack Stand Extensions
- Stand Transporter
- Mobile Extension Shelf

### Modular Jacks

Modular Jacks employ a separate lifting module and pump module. When an optional high-capacity pump cart is used, multiple lifting modules may be operated simultaneously.

### Highjack

Compact jack with 60 and 100 ton capacities.

## INFLATION

### Valve Hardware

All bore sizes available.

- Valves
- Stems
- Extensions
- Spuds
- Nuts
- Sleeves
- Tubing

### Valve Assembly Tool

Quickly assemble valves with our hydraulic pump operated tool. Fast and user friendly!

### Tire Pressure Gauges

Rugged, easy-reading gauges have liquid-filled faces that glow in the dark for clear, accurate readings. Offered in standard and upside-down faces, and in PSI or KPA.

### Mem-O-rings

O-rings developed by GMI Wheels to outperform the competition. Available in premium and high temp versions, from 20 to 63-inches.

### Pressure Temperature Gauge

Easy-to-use safety tool that determines the pressure and temperature in a wheel / tire assembly.

## TIRE DEMOUNTING / MOUNTING

### Bead Breakers

Safe, easy-to-use bead breakers for single-piece and multi-piece assemblies.

### Attachment Hardware

A lineup of high quality studs, nuts, clamps, and other attachment hardware, priced to help your bottom line!

## COMPOUNDS

### Mounting Compound

Available in Standard and Premium formulas for value-priced bead mounting.

### Wheel & Tire Conditioner

Prevents rim corrosion and cleans tire beads. Excellent price and value.

GMI RED  
-40°F / -40°C  
GMI ORANGE  
-20°F / 6°C

## SAFETY & SERVICES

### Wheel Wear / Profile Gauges

User-friendly gauges that allow tire technicians to view which wheel components are worn and need replacement, and identify lock ring profiles. Available in 20" - 49" and 49" - 63".

### Non-Destructive Testing

Improve site safety and wheel lifespan with GMI Wheels' 'Crack Testing' program. Our NDT process helps detect cracks, fractures, scoring and pitting in wheel components, before they grow into larger problems.

Every Crack Test includes an easy-to-read form with information on the wheel and its PASS or FAIL status.

### GMI D System

The GMI D System is a user-friendly and cost-effective system of tracking serialized wheels throughout their lifespan via RFID. Helps tire shops and end-users manage their inventory and participate in our NDT program.
