

KOMATSU WA900: 45" X 36", EM SERIES WHEELS

MARATHON
INDUSTRIES INTERNATIONAL

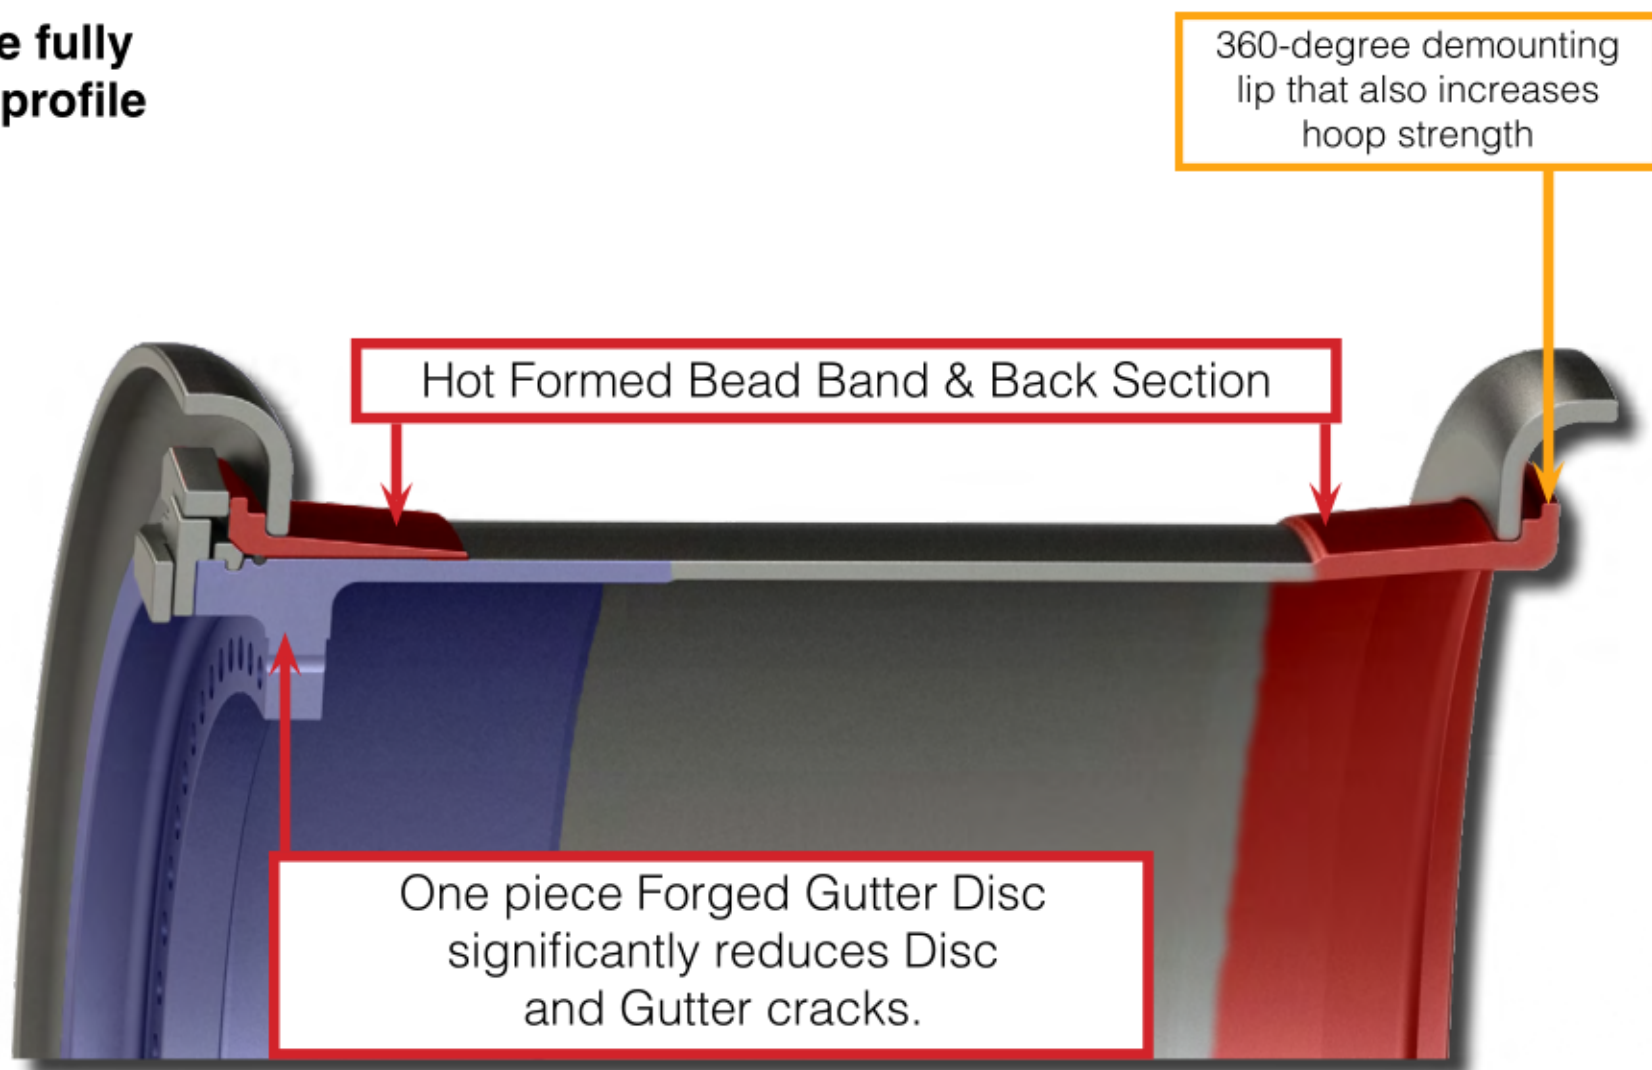

EM PROFILE; (45" X 36") - 5-PIECE - WA5-4536-AH03-A04

FORGED GUTTER SECTION

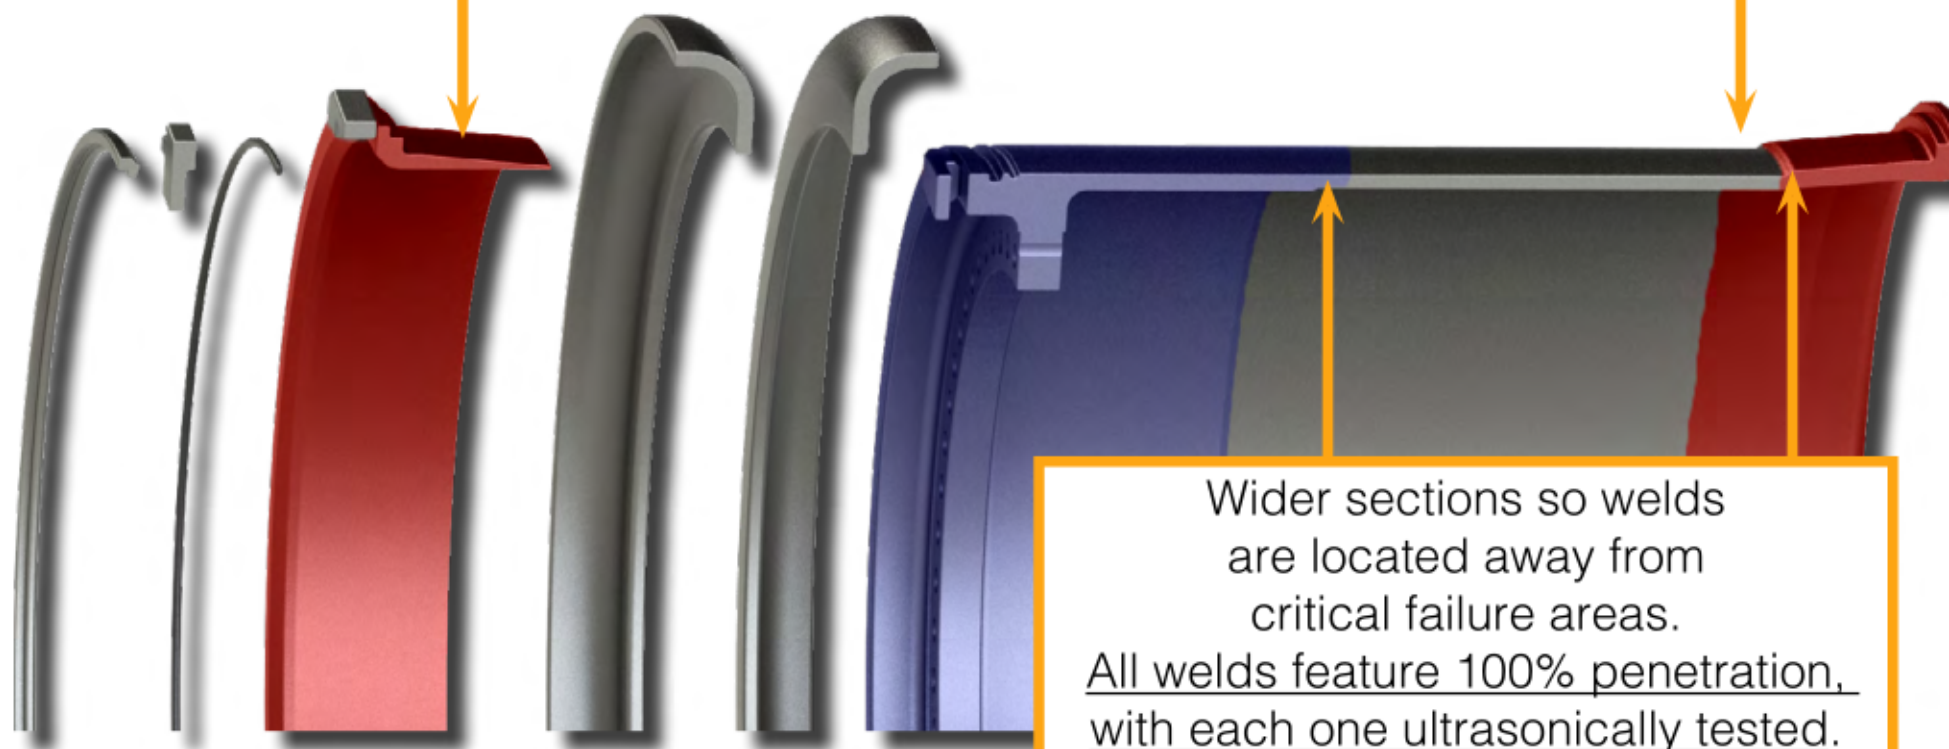

GMI Wheels are fully machined to a profile after welding, providing the most uniform, round wheel with the best air seal in the market.

Engineered for long service life and backed by the best warranty.

EM PROFILE; (45" X 36") - 5-PIECE - WA5-4536-AH03-A04

GMI Wheels' Bead Bands and Back Sections are machined, eliminating the need for Knurling. Knurling creates indents in tire beads, leading to tire damage and air loss.

Wider sections so welds are located away from critical failure areas.
All welds feature 100% penetration, with each one ultrasonically tested.

GMI WHEELS BEAD BAND BENEFITS

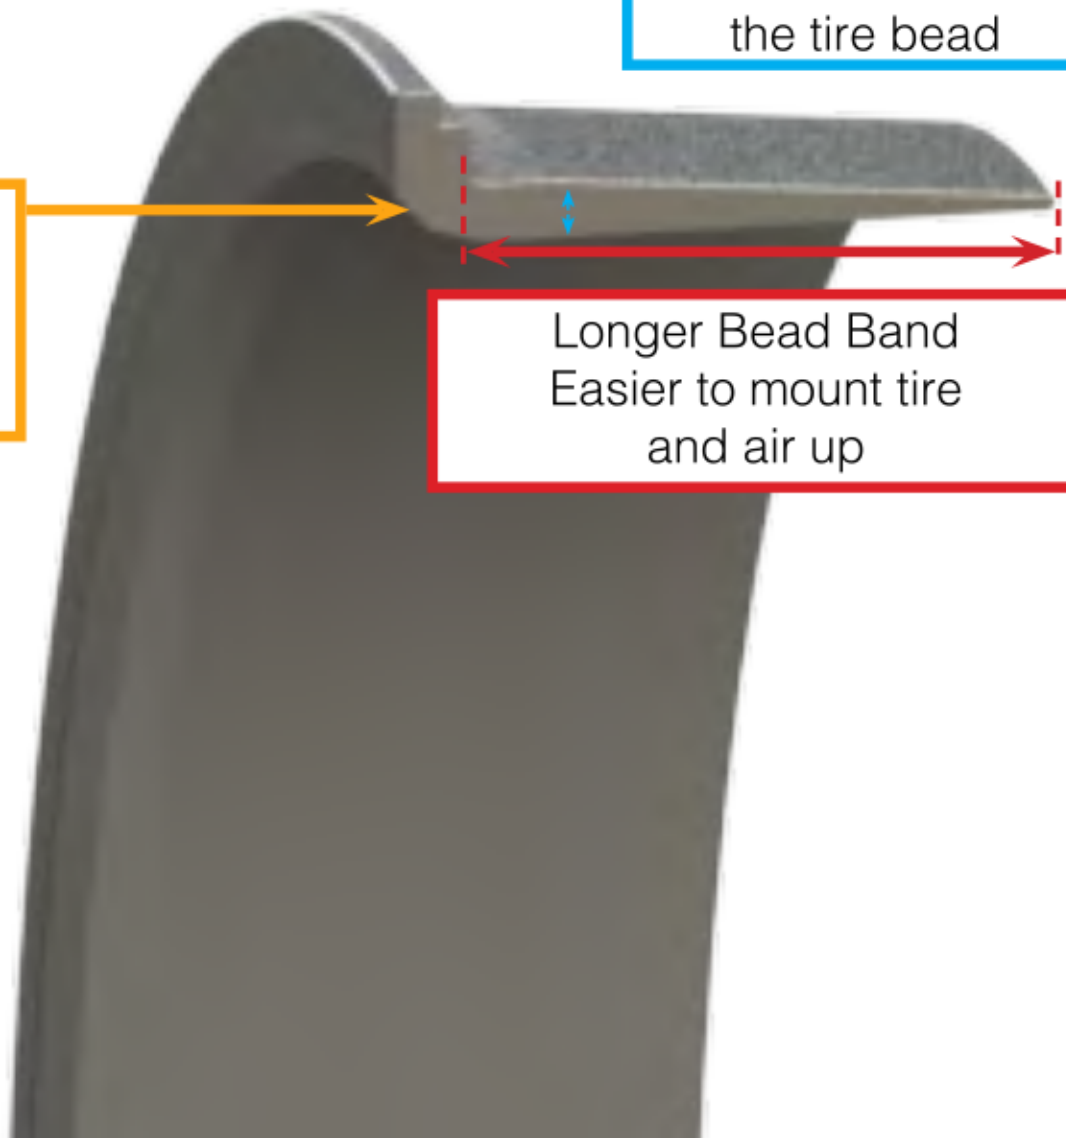

MARATHON
INDUSTRIES INTERNATIONAL

Thicker, fully machined Bead Bands provide much less flex and movement against Lock Ring and provide excellent O-ring air seal
Prevents premature cracks on Lock Ring grooves.

Thicker underneath the tire bead

Machined surfaces for excellent mating to Lock Ring and improved O-ring fitment

Longer Bead Band
Easier to mount tire and air up

TIRE FRIENDLY WHEELS

Without knurling, GMI Wheels' machined surfaces leave tire beads smooth, extending the service life of the tire

TIRE FRIENDLY WHEELS

MARATHON
INDUSTRIES INTERNATIONAL

Wheels with knurling can irreversibly damage the tire bead, by creating indentations or turning it concave, significantly reducing air seal and tire lifespan
